- 1.This will be unnecessary if you use it only by AF. Even in such a case, focusknob is attached.
- 2.This is unnecessary when you do not use zoom.
- 3.This is unnecessary when you use only AF.
- 4.I am not verifying whether I can use the other strobo.
- 5.Depth of water-proof of 246 ft. [practical use]
- 6.The finder is not included.
- 7.You can equip with UN company UNZ-2603 UW Monitoring Pro MARK II.
- 8.MF Band A is common to 1635, 2470, and 2870.
- 9.You can use "25020 Canon Hotshoe Plug to a Nikonos Bulkhead" of Nauticam. (It is good by an actual use test)
- 10.I recommend the finder made from INON. "45 degree view finder unit for X-2", "finder window unit for X-2"
- 11."straight view finder unit for X-2" A little vignetting. "Pickup finder unit 2 for X-2" cannot be used.
- 12.A "finder unit fixed screw ring" is required, and I use "X-2 Tool only for a finder unit" to bind it tight correctly.

- 13.Resisting pressure depth of water of 328 ft
- 14.Resisting pressure depth of water of 492 ft
- 15.It is a lens which cannot be carried in APSO-A7.
- 16.Mount adapter LA-EA3 is required. You can only manual focus.
- 17.Resisting pressure depth of water of 656 ft
- 18.LBD is usable even for LB mount.(It differs only in pressure) (LBD is a port Rated to 150-200 meters)
- 19.AF can be used almost
